

CASHIERPRO

ABOUT US

CashierPro

was developed from years of experience in high volume e-commerce transactions and overcoming challenges related to high volume processing.

CashierPro

can connect to multiple Payment Service Providers and Banks to intelligently channel e-commerce transactions for greater transaction success.

CashierPro

is designed to be easily integrated to online merchants for e-commerce transactions, supporting various methods of payments including credits cards, e-wallets, electronic debits and a host of other payment options.

Our Team

We are group of dedicated and passionate professionals with over 15 years of experience in the e-commerce industry.

Our Goal

Our goal is to make CashierPro the best solution in the market. Be the leverage of your @business online.

Our Location

Offices in Vancouver, Canada and San Jose, Costa Rica. A specialized location that allows our professionals to visit our clients if required at any moment.

SERVICES

CashierPro

Addresses the concerns and issues operators are experiencing with other cashiers available in the marketplace

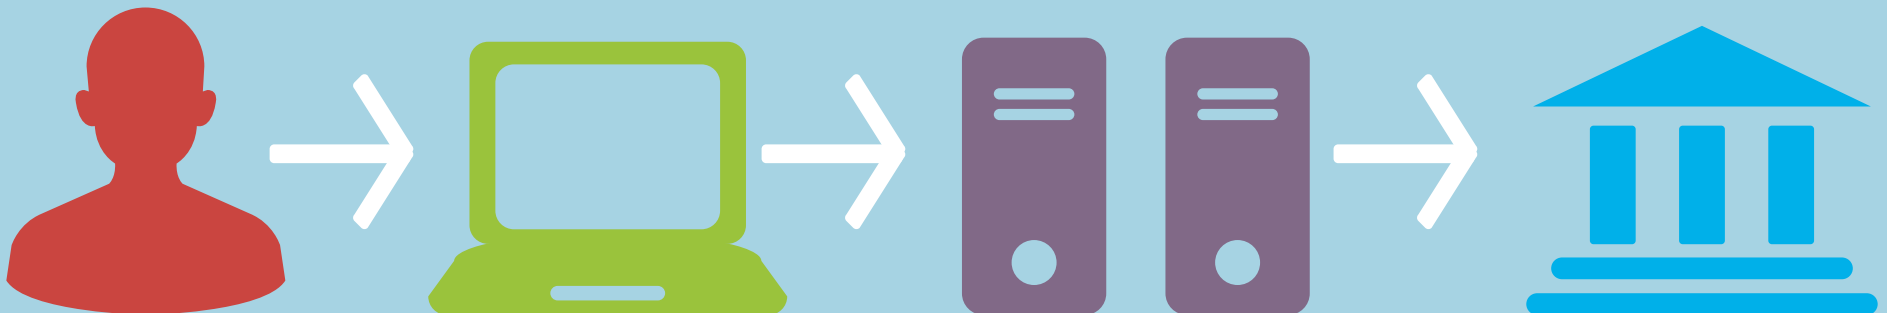

CashierPro

Uses innovative approaches to increasing e-commerce transaction success

How it works

CashierPro will be the connection between your platform and your end user. The CashierPro Software allows you to display the appropriate transaction options to your end user, receive the information and route to the selected transaction channel.

INTEGRATION

Real Time Features

Changes and Integration Completed in Real Time - Business needs must be fulfilled in a timely manner, that's why we built a system that is agile when it comes to making changes or integrating new.

Business Flexibility

Connect to any Payment Service Provider - CashierPro can be connected to virtually any other Payment/Payout method that is required by the client.

Multi-language Compliance

Compliant - Uses REST HTTPS communication which is the standard accepted by payment processors. If other method of communication is required the system can be updated to comply with the new requirements.

INTEGRATION

Technical Requirements

You only need one web server for CashierPro System with MS Server and a database server (with MS SQL). The rest of the necessary software can be installed during installation process.

Integration Time

Between 5 and 7 working days. Simple and easy to understand integration manual provided.

Customized Features

There is always room to improve your business. CashierPro is fully adaptable to any business core and size and we can provide you with specific features to enhance your business. The process is simple; we review your needs and provide a proposal; once approved by you, we proceed to design and implement the customized feature to your satisfaction.
